AI in Communication at the Workplace

PIK830-0925 UK-LDN-1

**If you can't train them,
you can't blame them!**

Short Description:

This training program on “AI in Communication at the Workplace” is designed to equip professionals with the knowledge and skills to effectively leverage artificial intelligence in workplace communication. As AI tools become increasingly integrated into daily business operations, understanding their capabilities, limitations and ethical implications is essential. The course covers key topics including AI powered writing assistants and voice recognition technologies, as well as their impact on collaboration, decision-making and productivity. Participants will explore how AI enhances communication efficiency while maintaining human-centred practices.

Course Overview:

COURSE OBJECTIVES

By the end of this INTERSTING STATE OF THE ART training program, participants will be able to:

- Understand the fundamentals of AI tools used in workplace communication, including their functions, benefits and potential challenges.
- Develop practical skills to effectively use AI applications.
- Enhance communication clarity and efficiency by integrating AI into messaging, documentation and collaboration workflows.
- Recognise ethical and professional considerations when using AI, including data privacy, bias and the importance of maintaining human oversight.
- Adapt communication strategies and team practices to align with the evolving role of AI in organisational setting.

TARGET AUDIENCE

- Team leaders.
- HR Professionals.
