Short Description:

COURSE OVERVIEW This training program is designed to provide participants with essential skills for effectively navigating the digital landscape. In today's fast-paced environment, understanding digital tools and their applications is crucial. Participants will engage with a variety of resources that emphasise the importance of digital literacy in professional settings. By focusing on the principles of digitisation, the program aims to foster a comprehensive understanding of how digital systems can be utilised to manage information efficiently. Through hands-on experiences and practical exercises, participants will develop proficiency in leveraging digital tools to streamline workflows. This enhancement of productivity not only facilitates better organisation but also promotes effective communication within teams. By the end of the program, participants will be equipped with the knowledge and skills necessary to implement best practices in file management, ensuring that they can adapt to the evolving demands of the digital world.

Course Overview:

Course Objectives

At the end of this program, participants will be able to:

- Acquire modern office management skills.
- Prepare effective public correspondence.
- Prepare effective private correspondence.
- Document files electronically.
- Archive files electronically.
- Save files electronically.
- Create comprehensive work reports using proper writing techniques.
- Acknowledge the importance of electronic supervision.
