Introduction to the Principles of Managerial Accounting

PIK758-0326 DZ-A-1

**If you can't train them,
you can't blame them!**

Short Description:

COURSE OVERVIEW This training program serves as an introduction to the principles of managerial accounting, specifically designed for those without a financial background. It emphasises the importance of utilising accounting information to enhance planning, decision-making, and control within an organisation. Participants will gain a foundational understanding of key financial concepts, enabling them to interpret and analyse financial data effectively. By bridging the gap between accounting principles and practical application, this program equips non-financial professionals with the tools necessary to navigate financial discussions and contribute meaningfully to their organizations. Moreover, the program empowers participants to enhance their strategic decision-making capabilities, fostering an environment where informed financial management is prioritised. By understanding the implications of financial data, individuals will be better positioned to make decisions that align with organisational goals. Ultimately, this training not only contributes to personal professional development but also supports overall organisational success by encouraging a culture of informed decision-making that leverages financial insights for effective management.

Course Overview:

COURSE OBJECTIVES

By the end of this program, participants will be able to:

- Understand fundamental managerial accounting concepts and their applications.
- Utilise accounting information for effective planning and budgeting.
- Analyse financial data to support strategic decision-making.
- Implement control mechanisms to monitor and improve organisational performance.
- Communicate financial insights effectively to support business decisions.
- Identify key performance indicators to evaluate organisational success.
- Apply ethical considerations in managerial accounting practices.

TARGET AUDIENCE

- Project Managers.
- Operations Managers.
- Marketing Professionals.
