Managing Contracts, Project Risk & Compliance

PIK781-0825 UK-LDN-1

**If you can't train them,
you can't blame them!**

Short Description:

COURSE OVERVIEW The Contract in Project Risk Management and Compliance program provides a comprehensive education for participants on the intricacies of managing contracts within the framework of project risk and compliance. This program delves into various contractual frameworks and obligations, emphasising the importance of understanding the legal and practical aspects of contracts. By exploring risk mitigation strategies, participants become equipped to navigate potential challenges that may arise during project execution, thereby fostering a thorough understanding of how effective contract management plays a pivotal role in achieving project objectives. Moreover, the program emphasizes the critical need for ensuring compliance throughout the lifecycle of a project. Participants are trained to implement best practices in contract management that not only safeguard against legal pitfalls but also enhance overall project outcomes. By integrating compliance considerations into their contract management approach, participants can better anticipate risks and develop proactive strategies that contribute to the successful delivery of projects. This educational experience ultimately empowers individuals with the skills necessary to manage contracts effectively, thereby promoting both accountability and excellence in project execution.

Course Overview:

COURSE OBJECTIVES

At the end of this program, participants will be able to:

- Apply useful techniques for identifying, analysing, mitigating, and monitoring risks throughout the project life cycle.
- Utilise a practical, six-step process to effectively manage project risk.
- Review the impacts of various approaches to risk allocation.
- Explore different contract types for transferring risks.
- Consider contractual techniques that ensure effective risk allocation.
