Procurement & Supply Chain Management

PIK798-0626 HLD-A-1

**If you can't train them,
you can't blame them!**

Short Description:

The training program in Strategic Purchasing and Supply Management aims to provide participants with essential skills and knowledge necessary for excelling in procurement and supply chain management. By focusing on the intricacies of procurement processes, the program fosters a comprehensive understanding of supplier relationships, negotiation tactics, and strategic sourcing. This foundational knowledge is critical for professionals seeking to enhance their effectiveness in managing purchasing activities within their organisations. Moreover, the program seeks to develop participants' abilities to contribute significantly to organisational success through improved management of supply chain dynamics. By equipping individuals with the tools to analyse market trends, manage supplier performance, and implement cost-effective purchasing strategies, the training empowers participants to drive efficiency and innovation. Ultimately, this program is designed to cultivate a workforce capable of navigating the complexities of supply chain management in today's competitive business environment.

Course Overview:

At the end of the program, participants will be able to:

- Understand the strategic importance of purchasing and supply management.
- Implement best practices in procurement processes.
- Develop and maintain strategic supplier relationships.
- Optimise supply chain efficiency and effectiveness.
- Utilise tools and techniques for strategic decision-making in procurement.
- Analyse market trends to inform purchasing strategies.
- Assess risk management within the supply chain.
