	Practical Skills in CPD ACCREDITED PIK824-0526 SWT-G-1	•	Management -		you can't train them, ou can't blame them!

## **Short Description:**

This educational training program is designed for individuals interested in enhancing their practical capabilities in Project Management (PM). Participants will have the opportunity to explore advanced practical methods for managing projects and programs, with a focus on achieving success even in large and high-risk endeavour. The training program emphasises the integration of PM process into organisation's culture and highlights the necessary steps to support and ensure its success. Improvements in Project Scope Management and Stakeholder Analysis are ongoing in the field of project and program management. In this training program, participants will gain knowledge of the latest tools for effectively engaging stakeholders and enhancing project quality. The training program covers a range of topics including project planning, estimation, scheduling and other advanced concepts that will assist participants in developing robust, dependable, efficient and successful project plans.

## **Course Overview:**

## **COURSE OBJECTIVES:**

#### On completing this training program, participants will be capable of:

- Monitoring projects using concrete measurements rather than speculation.
- Improving time and cost estimates for risky and complex projects.
- Reporting progress even on intricate and hazardous projects.
- Enhancing communication and participation with stakeholders.
- Understanding and mastering the interpersonal skills necessary for proficient PM.
- Developing the ability to communicate horizontally across functional levels and vertically with senior management.
- Defining project goals and assignments.
- Utilising scheduling methods and tools to support project control and analysis.
